Internet of Things applications for Agriculture and Connected and Autonomous Vehicle systems.
Canada

Greetings to the Hiring Manager.

I wish to apply for the Co-op position at Internet of Things applications for Agriculture and Connected and Autonomous Vehicle systems. As a Computer Science student going into my third year, I feel I am well qualified for the position with the programming skills I have learned as well as the interpersonal skills my volunteer experience has given me. This rounded skill set is highly relevant to the position.

My technical skills are a strong proficiency in the programing languages C++, Python and Java; this is a solid basis to learn any other languages needed for the job. I have a good grasp on Agile work environments and the usage of a Scrum. My skills in UML design diagramming will be an asset in the planning of any large-scale project. I have experience developing software in a team environment using version control system like Git. These skills and experiences will help me to fulfill the most important responsibilities of the position. I have always had a strong attention to detail, I like things to be as close to perfect as possible. I have a strong curiosity and willingness to learn that would contribute to my success as a co-op student at Internet of Things applications for Agriculture and Connected and Autonomous Vehicle systems.

I have solid communication and leadership skills which I have gained and used through Scouting and HAM Radio. I have taken several leadership training courses and have used them to instruct and supervise Scouting youth. I have also taken a leadership role in running net control for Ride4Life which involved coordinating reports from multiple base stations to ensure the safety and needs of the participants in the event. Also, I am comfortable working towards meeting pre-defined timelines and delivering quality work while raising any concerns or issues and ensuring their timely resolution.

I am excited to work at your company because it will give me an opportunity to learn so much and gain experience in working a job in the field of computer science. I hope to contribute as much as possible.

Thank you for your time and consideration. I hope that my enthusiasm shines through and that you find me a successful candidate.

Regards.
